- **Whole School Reading, Writing, Maths and PSHE**

Each class will be focusing on high quality teaching of reading, writing, maths and PSHE. The children will be having short targeted sessions each day on basic skills in addition to full curricular lessons.

To run alongside this, the teachers will be benefiting from speech and language training which will be used in class to improve vocabulary, verbal reasoning and comprehension skills.

- **Targeted small groups**

Through teacher assessment there will be small group interventions running before and after school in order to support those children with gaps in their learning. These groups will support the quality first teaching in classrooms in order to accelerate progress.

- **Social Emotional and Mental Health**

As a school we have seen and felt the impact of the Pandemic on our children. We have increased the capacity of our Learning Mentor team in order to give support to those children and families who need it.

We have also focused on school expectations and learning behaviours in order to support those children who need to focus on the positive.
