

Templenewsam Halton Primary School
Curriculum Intent statement - Geography

Geographers attempt to understand the world we live in: how it was before, how it is now and how it will be in the future. At Templenewsam Halton Primary School, children are encouraged to deepen their knowledge and understanding of the world, as well as their own place within it. Our intent, when teaching Geography, is to spark children's curiosity and fascination about the world around them and the elements within it; to enable them to realise that the world is a diverse place and to understand the need to respect that diversity; to describe and understand the Earth's key human and physical processes and to be aware of the impact humans are having on the world they live in and the responsibilities we have to ensure life continues to thrive on our planet.
