

## Templenessam Halton Primary School

### Curriculum Intent statement - Modern Foreign Languages

We want our children to leave TNHPS with the confidence to hold basic conversations in three different languages. We want our children to develop a broad knowledge of different countries and their cultural practices. Teaching the languages and vocabulary will be interwoven and relevant to the cultural topics being taught. Through our MFL curriculum, we want our learners at TNHPS to understand and explore other cultures and see their place in the wider world. We are implementing this curriculum to develop well rounded individuals who will develop curiosity about the world beyond their local community. As we live in a diverse society, we need to reflect this in our teaching and learning.

To support communication our MFL curriculum will enable children to become confident speakers and hold basic conversations in three different languages. We will do this through a variety of teaching methods including role play, drama, song and dance and conversation.

Through MFL, our learners will become aware of the range of these languages across the world and not just their country of origin. We intend on developing links with parents and other members of the community who are native speakers. We hope to spark a sense of adventure in our children and to develop curiosity about different cultures and exploring their place in the wider world. Children will be engaged with our curriculum through a wide range of practical activities and themed days.
