

Templenewsam Halton Primary School
Curriculum Intent statement - Science

At Templenewsam Halton Primary School, we believe that Science is a vital part of our curriculum; it is designed to engage and challenge our children whilst ensuring they understand the value and importance of Science in the world around them. We aim to equip our pupils with the scientific knowledge required to understand the uses and implications of science, today and for the future. To ensure children reach their full potential in Science, a practical and challenging curriculum is provided, with a balance of knowledge based learning and hands on opportunities to deepen their understanding. Instilling a natural curiosity from EYFS and building on this in subsequent years, children will develop their knowledge, scientific enquiry and working scientifically skills. Asking questions is encouraged and we aim to cultivate love and respect for science and the natural world.
